## About the Programme

Over the course of weekend, you will be introduced to mindfulness and guided in various meditation practices by a fully qualified mindfulness teacher.

Practising core meditation practices such as the body scan, sitting meditation and mindful movement, you will develop skills which you can incorporate into your everyday life. Mindfulness teaches us to bring our awareness to the present moment, to what is happening ‘right here, right now’. This awareness is cultivated with an attitude of compassion towards ourselves and our experience.

Many misconceptions about mindfulness exist. It does not allow us to empty the mind of thoughts or achieve some higher state of ultimate peace and calm. Rather the practices experienced will help to develop a certain degree of concentration and steadiness in the mind which brings insight into what is going on in our experience in any given moment. Meditation helps us to see what is present and how we are relating to it.

As well as guiding the above meditations, the teacher will share some background and theory to support integration into daily life, which may also provide food for thought. You will also have the opportunity to enjoy mindful walking and experience through the senses this beautiful part of France.
